**PBEL CITY**

When we set out to look for the most ideal location for PBEL City, our priorities were simple – low noise levels, proximity to business districts, and lesser chances of the area being turned into a concrete jungle in the near future. Gachibowli and APPA Junction emerged as top contenders for PBEL City. Finally we zeroed in on APPA Junction.

Today, it's a lovely sight to behold PBEL City just adjacent to Exit 2 of the ORR, only 11km from Gachibowli and 8km from Mehdiapatnam, yet surrounded by permanent greenery and three lakes.

PBEL City stands testimony to the fact that one doesn't have to live far away from work to enjoy a life in the lap of nature.

PBEL City is constructed by L&T, India's largest and best construction company. That one fact is enough to ensure that your home is made to last.

PBEL City uses Shear Wall technology that has revolutionized the way homes are built worldwide. As the name signifies, Shear Wall is used to resist shear, the lateral force which causes the bulk of damage in earthquakes. For you this means earthquake resistance, more floor space (thanks to thinner, stronger walls) and a fine, lustrous finish.

Inside, each apartment is made to careful specifications, taking into account Vaastu guidelines. The walls are designed to keep out sound and heat. Large windows ensure that daylight permeates every room as does a pleasant breeze. Every flat is fitted with fire safety technology.

Lush green landscaped spaces, playgrounds and parks surround the towers creating a safe, healthy and green environment.

# In the lap of nature

Surrounded by heritage rocks, PBEL City offers breathtaking views. Protected by the Government, these natural rock formations will always remain. PBEL City also faces a lovely lake, Peeram Cheruvu. The 35-acre lake is cared for and maintained by PBEL so that you can enjoy the peaceful setting.
